

## Environmental Health Services

The responsibility for the preservation and the improvement of the environment; safety of food products, disposal for waste products, protection of potable water supplies, elimination of nuisances and environmental hazards in the community. It's estimated yearly in the US that foodborne diseases alone cause an estimated 48 million illnesses, 128,00 hospitalizations and 3000 deaths. These diseases can affect so many people, which is why it's so important to ensure that the food and water we consume are safe and that sewage is disposed of properly.

## Disease Trends

Many of the roughly 70+ reportable diseases require constant surveillance, some require reporting within 24 hours due to the threat they present to public health. CD surveillance involves filing disease reports, partner notification, constant communication with the medical community, and sometimes restriction from work and other personal freedoms.

CHIP Clients .....	35
CHIP Immunizations .....	86

## Maternal and Child Health Services

### Women, Infants and Children (WIC)

The WIC program provides supplemental food and nutrition information for low-income women, infants and children in Piatt and DeWitt Counties.

Eligible participants include women during pregnancy, postpartum, and lactating periods, and children under the age of 5. Participants must meet the financial guidelines established by the USDA and have an identified medical or nutritional risk. Breastfeeding support is also available.

### Participants

Number of Participants in WIC.....	170
Breastfeeding (exclusively).....	6 out of 59 participants - 10.2%

### Family Case Management

The goal of the Family Case Management Program is to create healthy, self-sufficient families by working with women prenatally and throughout the perinatal period.
