

ENVIRONMENTAL HEALTH SERVICES

The responsibility for the preservation and the improvement of the environment; safety of food products, disposal for waste products, protection of potable water supplies, elimination of nuisances and environmental hazards in the community. It's estimated yearly in the US that foodborne diseases alone cause an estimated 48 million illnesses, 128,00 hospitalizations and 3000 deaths. These diseases can affect so many people, which is why it's so important to ensure that the food and water we consume are safe and that sewage is disposed of properly.

DISEASE TRENDS

Many of the roughly 70+ reportable diseases require constant surveillance, some require reporting within 24 hours due to the threat they present to public health. CD surveillance involves filing disease reports, partner notification, constant communication with the medical community, and sometimes restriction from work and other personal freedoms.

HEALTH PROTECTION SERVICES

Tuberculosis Control Program

The TB Control Program's main objective is to detect TB, both active and inactive. Prevention therapy for inactive cases of TB is an important role, as well as educating health care workers and the general public about tuberculosis.

TB Skin Tests	161
TB Investigations	0

Immunizations

Childhood and adult immunizations are given at our agency. Protection against childhood diseases is a primary concern of the agency. Adult immunizations include Tetanus, Influenza and Hepatitis B.

MATERNAL AND CHILD HEALTH SERVICES

Women, Infants and Children (WIC)

The WIC program provides supplemental food and nutrition information for low-income women, infants and children in Piatt and DeWitt Counties. Eligible participants include women during pregnancy, postpartum, and lactating periods, and children under the age of 5. Participants must meet the financial guidelines established by the USDA and have an identified medical or nutritional risk. Breastfeeding support is also available.

No. of Participants per WIC categories

Infants	61
Children	124
Pregnant	26
Breastfeeding (exclusively)	11
Postpartum	26

Family Case Management

The goal of the Family Case Management Program is to create healthy, self-sufficient families by working with women prenatally and throughout the perinatal period.
